Work experience & Projects

Blinks / Branding, Illustration, Web Design

March 2016 - October 2016

Helped with advertising and web design, branding, and illustrated characters for an iOS sticker app.

Studio Jam/ UI Design and Development

June 2016 - March 2017

Worked on a development of a hackaton project, on all visual design stages from concept to final front-end implementation.

Freelance/ UI & UX Design

September 2017 - present

Branding, logo design, and developing functional designs for web and mobile apps, with focus on site functionality, good user experience and common design patterns for variety of clients.

Futurae / UI & UX Design

May 2018 - June 2018

Futurae is a Swiss systems security startup, specializing in product authentication suite. I have worked with them on redesign their website, focusing on developing a good user experience for clients as well as developers using their product.

VCRP / UI & UX Design, Front End development

May 2018 - June 2018

VCRP is a platform offering a roleplaying experience for gamers based on a variety of video games. My role was redesigning their user and admin control panel, login / register workflow all while following strict guidelines.
